Langenthal, 26.12.2022

Ladies and gentlemen of the SRO management

I had written to you for many months of work and even half a dozen years that the KESB street gangs should be stopped here, no longer using the street gangs to get into my office, including those with the cantonal coat of arms.

After a nice day of festivities yesterday, I went unsuspectingly to the Nokia that had been delivered this morning, which I fished out as the poorest mobile phone on the market, which was no coincidence.

It turned out to be the parallel scoundrels of the consortium from America (Microsoft and Apple and Android) and just a little wake-up thinking this morning, especially from Microsoft and especially from this Nokia.

I compiled 30 files and uploaded them to the megastores New-York, Washington D.C. and San Francisco to the megastore in Bonn and Basel. Before lunch called where I said I happen to be working on the same socket but with a difference of a long standing Factory2 build like Microsoft except I have a ready made one on top, on the consortium socket. These are Ruffleshop.de's four blocks of best megastores with 15 buy-it-now b2b business private home office products.

Since May, with Fabrik2, I would have only been controlled by Microsoft, Apple and Android. And this on the home stretch of consortium and my factory2.

I don't know what the canton coat of arms street gangs are supposed to be doing here before Christmas with the eviction of my club by the local restaurant owner via Bern-Zürich-Strasse this time. I'm the leader with a 7-point lead and the next match with Langenthal will take place in Wankdorf.

Why are my phones according to SRO Dr. H. Wyss listened in, routed and blocked SMS and e-mail. If I just produce the highest level of security on the Internet in the factory, in contrast to what seems to be reality with the Ruffle Emulator Project, but is already rudimentary, on the marketing-sales strategy of the world's largest IT specialists in the world, in contrast to the Swiss ones, for example, which are tiny and no rush at all on my factory streets 1, 2 and on another street like working there today No. 3 is internationally permitted by the trade police. The church newspaper still rests here as the original source, such as wine from federal councillors, friendships of the party, of the others. Party of origin in Switzerland, for example.

Factory 1 and 2 are related to the technology and my patent TMPreprocessor[®] and are signposted everywhere, including in Bern stores.

Andreas Lützenberger 26.12.2022

The photo above shows the 15 kernels being processed after a final product correction when uploading from the server at Oberhardstrasse 20a to the two international ones, a Baselworld in Basel.

The Nokia C21 Plus for CHF 117 is very cheap and to my surprise the Ruffleshop.de 's Megastores 15 shop items 31 to 45 in action can all be seen with it. The battery has a very long runtime of two days and much more.

You have to reinstall the browsers, uninstall the old ones first. Because everything has developed so quickly.

As of today, I re-estimate my factory at CHF 1 million to 3 million from the point of view of Microsoft companies.
